Catch Basin Filter Frame Insert

Prevent Down Stream Debris Solids & Pollutants From Entering Stormdrains

- Removes unwanted hydrocarbons/pesticides/pollutant/bacteria water – ADSORBS oil and petroleum from gas, diesel, and hydrocarbon based cleaners & solvents.
- Improves/reduces Total Suspended Solids from water – Collects trash/bottles/plastic bags from ocean/river/lake/stream outlets.
- Directs water over filter bags 100% of the time using innovative directional “splash guards”
- Integrated Debris Catch works at the source filtering solids – “no” extra parts needing frequent repair. *Sediment Bags do not fill up and rip off clogging outlet/storm drain systems.*
- Easy To Inspect & Recognize when maintenance needs to be completed
- Variable configurations to meet your needs – no cutting or re-welding or retrofits
- Constructed of 100% 304 16g Stainless Steel meeting Federal EPA standards Made in USA Not just assembled in USA coated galvanized metal.
- Comes with Mirafe geo-textile sediment bag attached below the debris catch. Does not back up outlets leaving standing swamp water; sediment build-up; odors & vectors.
- Uses 80% Media Fill Filter Bags – Cleans water up to 3 times better than other options.
- **Approved: Equal to OR better than alternative to more expensive alternatives.**

Manufacturer Filter Test Results

Total Suspended Solids (TSS) captures 80% w debris catches over outlet. Filter Test Results Per 22"x 2" - Media@ 80% Fill Rate = +80% Oil/Grease Hydrocarbons & 60% Total Phosphorus (TP)
